

I'm currently searching for a person to manage a Quality program for a smaller, 40 employee food company in Southern Illinois, about 1 hour out of St. Louis. They are privately held and have been growing steadily for the last 15+ years. They are wanting to take the business to the next level and are looking for a Quality pro to join their new management team to help accomplish that.

The person should be degreed, and have at least 3 or 4 years experience in the food, beverage or Rx processing with a good mastery of QA, HACCP, sanitation, SPC., food safety programs, quality auditing, customer complaints and GMPs.

This is not a "baby-sitting" position. They are really wanting a hands-on person who would thrive in a smaller, growing environment and who can make a difference. If you know of anyone that might find this opportunity interesting, please let me know. Please reference e1297. Thank you.
