

Our client, FEP Search Group, has a couple of job openings in the Midwest for Quality professionals. I've put together some info on these positions below and was wondering if you could recommend potential candidates from your network that you think highly of and might appreciate learning more about these positions?

1) Quality Assurance Manager

Client: Manufacturer of snack and confectionary products

Experience Needed: 5 - 7 years in the food industry and has previously worked in a supervisory role

2) Quality Assurance Manager

Client: Publicly owned manufacturer of beverages

Experience: Minimum 7 years of experience in a liquid food processing facility with a strong background/understanding of food/beverage process engineering principles and knowledge of designing, implementing and maintaining GMPs and juice HACCP programs

3) Quality Assurance Manager/Director

Client: A privately owned manufacturer of snacks and confectionary products

Experience: 7+ years of experience (including lab) and prior packaging experience; Knowledge of ISO, FDA and regulatory affairs and a degree (4 year) in Chemical field

If you can think of someone you may have worked with in the past that meets the criteria I've described above, would you be so kind as to forward this email to them? Or perhaps ask them to get in touch with me directly and I will connect them with the appropriate hiring manager.

Thanks and regards,

Joel
